

What do we bring to your establishment?

If needed, we have a full, digital and self powered PA system that is flexible enough to be used indoors or outdoors. Run entirely wirelessly, we have the ability to adjust, on the fly, from anywhere in the venue. We also have a full indoor/outdoor lighting system that is fully controllable from the band along with moving-head lights and water-based fog to set the mood for the audience.

Our system includes components from Presonus, JBL, Soundcraft, EV and Rockville. Both of our singers use in-ear monitoring systems to keep the stage volume to a minimum while keeping a clean stage look.
